SWITCH DETAIL

SWITCH BACK VIEW

ALL TERMINALS MUST BE ORIENTED AS SHOWN IN THESE VIEWS.

Functionally check switch lock-out #49 by attempting to turn on tool by applying a reasonable amount of force, up to 8 lbs., to the switch trigger #26. The tool must not turn on. Release trigger. Actuate the lock-out lever and apply a reasonable amount of force to the switch trigger. The tool and LED must turn on. While the trigger is still in the "ON" position, release the lock-out. Release the trigger. The tool and LED must stop and the lock-out lever must again prevent the actuation of the switch. Repeat the switch check two more times.
