FIG. A clean, dry surface is essential for proper performance for any adhesive system. The area intended for application of any adhesive label or nameplate must be prepared by cleaning with isopropyl alcohol. The solvent is to be applied with a clean, lint free applicator and the surface allowed to dry before applying any label or nameplate.

SCREW TORQUE SPECIFICATIONS				
			SEAT TORQUE	
FIG.	PART NO.	WHERE USED	(kgf-cm)	(lb-in)
2		Fan Dome, Fan	17-20	14-7-17.3
6		Inlet Duct	6-8	5.2-6.9
7		Inlet Duct, Outlet Cone	13-15	11.2-13.0
23		Hsg. Halves, Interfaces	11-13	9.5-11.2
28	05-81-0277	Motor Insulator Halve	6-8	5.2-6.9
36	05-81-1195	Fuse Trace Board	5-7	4.3-6.0

WIRING

As an aid to reassembly, take notice of wire routing and position in wire guides and traps while dismantling tool.

Be sure that all components of the electronics kit are seated firmly and squarely in the housing recesses.

Avoid pinched wires, be sure that all wires and sleeves are pressed completely down in wire guides and traps.

Prior to securing the housing cover onto the housing support, be sure that there are no interferences.

Before installing the battery, check for proper functionality of on-off switch trigger and lock-off shuttle.

Install batteries and depress on-off switch trigger to assure tool is operating properly.
