FIG. NOTES
19 As an aide to installation, brushes may have to be put in at a slight angle.
36 Place all screws in before tightening. Do not overtighten.

A clean, dry surface is essential for proper performance for any adhesive system. The area intended for application of any adhesive label or nameplate must be prepared by cleaning with isopropyl alcohol. The solvent is to be applied with a clean, lint free applicator and the surface allowed to dry before applying the label or nameplate.
