Inserting the Plunger Rod

Always lock the trigger or remove the battery pack before inserting the plunger rod. Do not run the tool to pull the plunger rod through the tool, this will damage the tool and rod. Manually push the plunger rod through the tool, as follows:

- 1. Press in and hold rod release trigger.
- 2. Grasp the plunger rod handle. The teeth on the plunger rod should point toward the left and slightly down.
- 3. Insert the plunger rod from the rear of the tool. It may be necessary to wiggle the plunger rod slightly while pushing it through the tool.

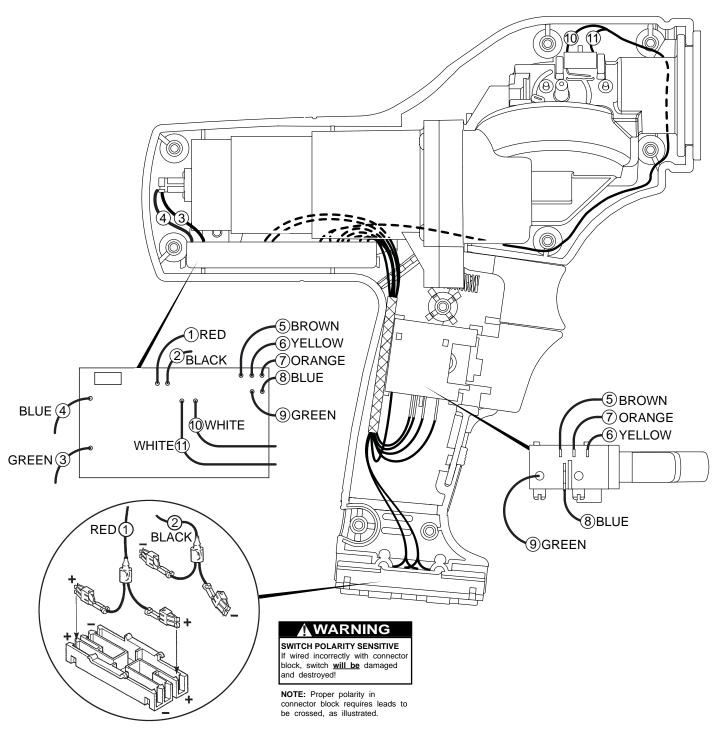

NOTE: Keep the plunger rod clean. Retracting or inserting a plunger that is covered with material may damage the internal parts of the tool.

13135 W. LISBON RD., BROOKFIELD, WI 53005

EXAMPLE: 00 0

Component Parts (Small #) Are Included When Ordering The Assembly (Large #).
